

Our client is one of Europe's leading integrated healthcare provider. With 26 countries, the company now offers a Europe-wide unique area coverage and is an important contribution to comprehensive health care. This means diverse challenges and flat hierarchies in an international environment. For his location in Fürth our client is looking for a qualified:

Network & Security Engineer with "SDWAN-know-how" (m/f/d)

Job-ID: CF-00004226

Job-Ort: Fürth

Main Tasks:

- Operate the Fortinet based SDWAN service for our European customers on a daily business basis
- Initiate and maintain contact with our internal European end customers to resolve ongoing incidents or service requests
- Act as the 3rd level support interface towards other PHX teams concerning SDWAN
- Create and maintain operational documents

Your technical qualifications:

- Apprenticeship / study as IT specialist for system integration or comparable well-founded IT qualification
- Knowledge of Fortinet SDWAN solution and/or SDWAN solutions from other vendors
- Good overall knowledge about network security solutions from Fortinet, e.g. firewalls, proxy and SSL interception
- Good knowledge in the implementation and administration of CISCO switching and routing

Your personal qualifications:

- An efficient, structured and customer-oriented way of working, especially in critical situations
- Analytical skills and the ability to create sustainable solutions by documenting and sharing knowledge
- Good business- and technical level English skills, both written and spoken

Our client offers:

You can expect interesting tasks in a modern, sustainable and international environment with individual development potentials. Other than an attractive salary, you can look forward to a reduced gym membership or using a job-bike.
