For our prestigious client we are looking for a qualified specialist for a project.

AEM Frontend Developer (m/f/d)

Job-ID: CP-00003865
Job-Ort: 100% remote

Project details:

- Develop software solutions with HTML, JS and CSS
- Collaborate with other disciplines for the production and delivery of project deliverables
- Create technical solutions according to interaction/visual specifications and client specific environment
- Estimate work and be accountable for delivering on tasks
- Raise potential scope issues to the team
- Evaluate complex and multi-faceted designs

Working place: 100% remote
Duration: August-December
Working hours: Fulltime

This project is based on a so called retainer model. This means that you will get paid for Fulltime (160 hours/month) and work "on call". If a project becomes available, you will be assigned to that. Even if there is no suitable project for a while, you will still get the payment for the full hours regardless of the hours you have worked.

Technical qualifications:

- 3+ years Experience with HTML, CSS, JS
- Strong experience with modern JS frameworks
- 3+ years Experience with AEM Frontend related Technology stack: Sling, HTL, Touch UI, SlingModels
- Experience working with REST and exchange formats like JSON and XML
- Experience with Source Control, e.g., GIT
- Experience with Agile delivery methodology and related supporting tools (JIRA, Confluence, etc)
- Experienced as a team-player in distributed teams and in customer interaction
