Our client is a dynamic and innovative software company for CAD/CAM software in the field of medical technology. For the location in Darmstadt our client is looking for a qualified:

Software tester for web applications - 40% - 60% remote possible

Job-ID: CF-00004267
Job-Ort: Darmstadt

Your main tasks:

- Test web application releases on a day-to-day and project-by-project basis
- Develop and execute comprehensive testing plans for each project release
- Fully understand the relevant product requirements and execute exploratory testing
- Attend meetings and deliver updates on testing progress
- Assist stakeholders in keeping application specifications accurate and up to date
- Work with Developers to improve automated testing where possible

Your technical qualifications:

- Minimum Bachelor’s degree
- 3+ years of testing experience including test planning and test execution
- Certification from ISTQB, Foundation-level or higher, or other recognized software testing certification
- Strong experience with ticket systems like JIRA
- Demonstrated experience testing large web applications
- Knowledge of cross-browser compatibility issues
- Knowledge of how and where web applications fail - knowing how to break things!
- Experience with security related problems in web applications
- Experience with scripting languages (e.g. Python, JavaScript/TypeScript) preferred
- Previous experience in an Agile development environment, or other continuous delivery methodology is a plus
- English: min. B2 (daily project language e.g. in meetings)
- German: min. B2 (main language at the Darmstadt location)

Your personal qualifications:

- Self-reliant way of working

Our client offers:

Exciting and varied activities in a dynamic and growth-oriented software company. You can expect flat structures and efficient decision-making processes. You can look forward to a positive working atmosphere that promotes both individual freedom and responsibility. Furthermore, you can expect a strong team spirit and a very good working atmosphere as well as modern offices and workplaces. Flexible working hours and home office options are a matter of course.
