Our client is a dynamic and innovative software company for CAD/CAM software in the field of medical technology.
For the location in Darmstadt our client is looking for a qualified:

Expert C++ Engineer (m/f/d) - 40%-60% remote possible

Job-ID: CF-00004142
Job-Ort: Darmstadt

Main tasks:

- Improve, prototype and implement from scratch algorithms in the field of surface reconstruction and manipulation
- Implement algorithm integration and necessary infrastructure to make things work smoothly
- Analyze software requirements and come up with effective solutions
- Operate as a part of a scrum team focused on RnD: actively participate in sprint planning, demo and retrospective, attend daily standups
- Create documentation, such as functional specifications or design documents
- Keep an eye on new technologies and introduce innovations to improve the product of our customer

Your technical qualifications:

- Master’s degree in Computer Science, Mathematics, Physics or related fields
- Excellent C++ knowledge (experience of 10+ year of commercial development)
- Algorithms and Data Structures is a must
- Image Processing and Computational Geometry is strongly desired
- Machine Learning is a big plus
- Good written and spoken English
- A2 German language skills and willing to improve
- Nice to have: experience with 3D/CAD/CAM applications

Your personal qualifications:

- Proved problem solving and analytical skills
- Good team player skills to work in geo-distributed team

Our client offers:

Exciting and varied activities in a dynamic and growth-oriented software company. You can expect flat structures and efficient decision-making processes. You can look forward to a positive working atmosphere that promotes both individual freedom and responsibility. Furthermore, you can expect a strong team spirit and a very good working atmosphere as well as modern offices and workplaces. Flexible working hours and home office options are a matter of course.
