

Our client is a wholly owned subsidiary of a worldwide insurance company offering a full range of managed services encompassing Data Management, Risk Controlling, Performance Analysis and Reporting for investments. As a one-stop shop for custom analysis and reporting solutions, the company provides scalable capabilities to handle any production volume. Asset Managers, Institutional Investors and Custodians rely on our client as an internationally operating partner for dependable long-term support. The key advantage of our client is a comprehensive coverage of business processes along the entire investment value chain. Backed by specialized technical and industry expertise, our customer delivers rapid results, while our clients concentrate on their core business as well as getting a decisive leg up on the competition.

For the location in Munich, our client is looking for a qualified:

Java Full Stack Developer in the area Web (m/f/d)

Job-ID: CF-00004598

Job-Ort: München

Remoteanteil / Home Office: 60%

Your main tasks:

- Design, conception and implementation of Java-based web applications using modern technologies and agile approaches
- Maintenance and further development of existing front-end solutions, e.g. with regard to performance optimization and improvement of user experience
- Focus on architecture, testing and implementation according to modern standards (e.g. clean code principles, cloud-based services)
- Competent point of contact for business units in the transformation of customer requirements into software requirements (including 3rd level support)
- Coordination of external development resources
-

Your technical requirements:

- Successfully completed technical or university studies in (business) computer science, mathematics or economics with IT orientation and/or comparable professional experience
- Good knowledge in the development of Java-based web applications (Java, Spring, REST)
- Several years of practical know-how in software implementation with front-end and back-end technologies
- Experience with HTML 5, CSS and JavaScript (jQuery, ExtJS, Angular)
- Knowledge of using Maven, npm, Jira, Git, Bitbucket and Continuous Integration
- Experience with relational databases (e.g. Oracle)
- Fluent language skills in english (B1 or good A2)

- Good language skills in German

Your personal requirements:

- Interest in finance
- Enthusiasm for new technologies
- Independent work and agile teamwork

Our client offers:

- Exciting challenges in a demanding, international project and customer environment
- A modern working environment that meets the highest standards in one of the most attractive cities in Europe
- An attractive salary package and good social benefits
- A wide range of training and development opportunities
