

Our client is one of Europe's leading integrated healthcare providers. With 26 countries, the company now offers a Europe-wide unique area coverage and is an important contribution to comprehensive health care. This means diverse challenges and flat hierarchies in an international environment.

For the location in Fürth in Bavaria, our client is looking as soon as possible for a qualified:

Linux System Engineer / Administrator (m/f/d)

Job-ID: CF-00004497

Ort: Fürth / Bayern

Remoteanteil / Home Office: 60% bis 100%

Your main tasks:

- Further development, monitoring and administration of the existing RHEL Linux server landscape
- Troubleshooting in the areas of servers, basic software (e.g. Samba, Apache), backup clients, virtualization and network
- Second level support of the central infrastructure for the corporate IT and internal business partners in Europe
- Coordination and management of external providers / service providers
- Collaboration with project and application teams to support projects and take over new services into operation

Your technical qualifications:

- Completed training as an IT specialist (m/f/d) system integration or completed studies in the IT environment
- Very good knowledge of current Linux distributions (preferably RHEL) and a broad basic knowledge of various IT systems
- Additional experience with AIX and Solaris is an advantage
- Good knowledge of ITIL standards
- English spoken and written

Your personal qualifications:

- Ability to work in a team
- High customer orientation as well as a solution-oriented way of working
- Strong communication skills

Our client offers:

- Interesting tasks in a modern, sustainable and international environment
- Individual development potentials
- An attractive salary
- More benefits like a reduced gym membership or using a job-bike
