

Our client is a dynamic and innovative software company for CAD/CAM software in the field of medical technology. For the location in Darmstadt our client is looking for a qualified:

Senior Business Analyst (m/f/d) - 40% remote possible

Job-ID: CF-00004245

Ort: Darmstadt

Your main tasks:

- Partnering with Product Owners to ensure continuous refinement of backlog, which may include stories from multiple projects
- Deliver precise functional specifications to include functional hierarchy, workflow, business rules, interface design and definitions, outstanding issues, data analysis, and data mapping
- Responsibility for direct interaction with stakeholders including, but not limited to, eliciting comprehensive business requirements and use cases and recommending appropriate solutions
- Gather requirements and help build and document specifications for development
- Conduct gap analysis between application and stated customer requirements and collaborate with Architects and Developers to estimate project impact
- Work with Development, QA, and Production Support teams to communicate, verify, and test the desired functionality changes
- Work with the stakeholders to demonstrate the changes to the system to ensure all relevant business needs are addressed
- Develop training materials and provide training in one-on-one or classroom environment
- Manage multiple competing priorities through effective organization and communication
- Recommend and institute BA best practice and methodology and tools
- Work within or across multiple project teams to ensure that blockers are resolved, and communication gaps are plugged quickly and efficiently
- Ensure quality and completeness of the finished product by participating in user acceptance testing, ensuring that acceptance criteria are met
- Working cross-functionally with the Clinical, Regulatory, R&D, Product Marketing, Customer Care, Sales teams to help drive innovation

Your technical qualifications:

- Bachelor's degree or equivalent combination of education/experience in Computer Science, Information Systems or related field
- Minimum of 7+ years information technology experience in a growth environment
- Exceptional prioritization, proficient problem analysis, process, and project management skills
- Experience with Jira and/or other application lifecycle management tool
- Experience working in an Agile software development environment
- Excellent written and verbal communication skills in English

Your personal qualifications:

- Exceptional problem-solving and decision-making skills
- Strong collaborator able to contribute to a variety of tasks
- Superior interpersonal, oral, and written communication skills

Our client offers:

Exciting and varied activities in a dynamic and growth-oriented software company. You can expect flat structures and efficient decision-making processes. You can look forward to a positive working atmosphere that promotes both individual freedom and responsibility. Furthermore, you can expect a strong team spirit and a very good working atmosphere as well as modern offices and workplaces. Flexible working hours and home office options are a matter of course.
