

Our client is the subsidiary of a global group that is a leader in the development, production and distribution of a wide range of electronic capital goods for industry, infrastructure operators and public purchasers. The independent group is one of the technology or market leaders in all its fields of activity. These areas of work range from mobile and high-frequency measurement technology to broadcast and media technology, air traffic control and military radio communications to cybersecurity and network technology. With more than 12,000 highly qualified employees in about 70 countries, the entire group generates an annual turnover of more than 2 billion euros. Our client is also a global leader in network analysis software. The company leverages its extensive expertise to create customized software solutions that enable its customers to transform network data into information. As soon as possible, we are looking for a qualified person for the location in Leipzig for this client as part of the permanent employment:

Senior Linux System Engineer (m/f/d)

Job-ID: CF-00003828

Ort: Leipzig

Main tasks:

- You are responsible for the automated setup of new services
- Monitor hardware and services
- Evaluate new cloud technologies
- Plan SDN environments
- Implement creative and solution-oriented concepts in complex system environments
- Operate within a team in an agile and international environment
- You are responsible for subprojects

Your technical qualifications:

- Completed training or degree with relevant work experience
- Basic Linux and version control skills: git, GitLab and Ansible (automation tool)
- Experience with Python
- Experience with Virtualization (Docker, ESXi)
- Knowledge of the following cloud services: vSphere, SDN, possibly Cloud Foundry, Kubernetes, Terraform, Cloud Data Management
- Determination and an organized working method to round off your profile

Our customer offers:

You can expect exciting customers and projects in a family and team-oriented working atmosphere with flat hierarchies. Furthermore, you can expect performance-related wages and attractive additional benefits. You can look forward to modern office space and a good work-life balance.
